I am a front-end web developer especially interested in building great websites experiences, shipping reliable applications and learning more about coding.

Education and Certifications

- **FullStack Web Developer -** Rolling Code School, Argentina.   **Oct 2022–June 2023**
    - Have been the Scrum Master on group projects.
    - Helped and upskilled my teammates with my previous Front-End knowledge.
- **Front-End Web Developer -** Self-Taught.   **Feb–July 2022**
    - Made several projects on my own.
- **Production of goods and services -** Nuestra Señora de la Merced, Argentina.   **2012–2017**

Technologies and Languages

- **Languages:** JavaScript (ECMAScript 6), TypeScript, CSS/CSS3 and HTML/HTML5.
- **Technologies:** React.js, APIs, Bootstrap 5, Material UI, Git and npm.
- **Others:** Trello, Scrum and Agile methodologies.

Projects

Spotify App: **May 2022**

- Developed a Spotify app to search and play music using data from the Spotify API.
- Used React with TypeScript to make the code more consistent.
- Built tests to improve the reliability of the app.
- Designed and rolled out the styles using the MUI library.
- See the source on Github.

Languages

- Spanish - Native.
- English - Full professional proficiency.

Interests

- I like to understand how the mind works, so I read a lot about psychology and neurology.
